Course Description

The VC University course provides an overview of venture finance through lectures, interviews with leading venture capitalists, and interactive assessments. Participants will learn the nuts and bolts of venture finance and earn a certificate of completion from Berkeley Law, the National Venture Capital Association (NVCA), and Venture Forward. The course examines the economics of U.S. venture capital (“VC”) finance with a focus on developing financial models on how various provisions affect investor and founder valuation and cash flows. For example, students will learn how VC contract provisions are designed to protect investors from economic and voting dilution.

Learning Outcomes

This class is designed to provide an introduction to venture finance as it is used in practice. The course focuses on the application of the terms and processes and the economics of what is included and considered in a standard VC “term sheet.” The course aims to provide its students with a core set of practical skills that every venture capitalist, investor, and entrepreneur should master.

Format of Class

This class combines lectures, exercises, and in-person discussions – delivered online. This class is largely asynchronous, which means that you are not required to participate at the same time and place as other students in the class. You choose what time of day you are “in class.” We recommend setting a daily “class/study time” that fits your schedule and to adhere to it during the course, setting aside roughly 3–4 hours each week.

Instructor Office Hours and Communication

During the recommended ten-week schedule of the course, we have scheduled weekly office hours with instructors to provide opportunities for “live” discussion with them and your classmates that occur at scheduled times. Most of the office hours will be held on Tuesdays at 10:00 AM Pacific Time (some will be at 3:00 PM Pacific Time), via Zoom. Exact dates and the Zoom link will be provided on the course platform and are subject to change.

The office hours are designed to be similar to the experience you would have if you were a student on campus. They will not be recorded. You can attend and ask questions you may have about the course, the materials, or the lectures; however, to be respectful of our instructors’ time, we will send a weekly reminder of office hours.

Graded Quizzes

Each module ends with a graded quiz and these quizzes may be taken multiple times; however, please note that **your final grade will be an average of all of your attempts**. Read the questions carefully and please submit your answers with care. A typo will be counted against you. If you have any questions regarding a quiz, submit a comment directly in Canvas by navigating to your Grades tab, click on the quiz on which you wish to leave a comment, and type the comment in the "Add a Comment" field that appears on the right side of the screen.

Certificate Eligibility

The program is designed to be completed in approximately ten weeks but **you will have access to the platform for five months to complete all of the requirements**. The modules must be done in order (i.e. completing one module will "unlock" the next). In addition to watching all the sessions (lectures, interviews, and labs), **a student must achieve a combined total average of 75% or higher on the graded quizzes**. If you have questions or concerns regarding a quiz, please submit a comment on the quiz page in question. Once you have finished the course, you must complete the post-program survey in order to receive your certificate. Certificates will be awarded on a rolling weekly basis beginning two months into the program.
